Summary

Process-oriented Data Analyst who approaches analysis by understanding business context before exploring the data, connecting case studies and storytelling to get to the root of a problem. Led the transformation of a fully manual, paper-based sales process into a real-time Excel dashboard system — eliminating month-end reporting delays and enabling faster, data-driven decisions on pricing and inventory. Proficient in Python, SQL, and Power BI, with hands-on project experience in regression analysis, time series, and forecasting. Track record of driving adoption of new systems and collaborating across teams to turn complex data into clear, actionable insight.

Experience

Odav Technologies
Business Analyst | Port Harcourt, Nigeria 2020 – Present

- Digitized a fully manual, paper-based sales process covering over ₦48 million in annual transactions across 15+ products/services, eliminating month-end reporting delays and enabling real-time tracking of sales, revenue, and expenses.
- Reduced daily sales report preparation time from 3 hours to 20 minutes by building an automated Excel-based reporting system used by a 3-person team.
- Built dashboards to monitor product-level performance, identifying high-margin vs. low-margin and fast-moving vs. slow-moving products, informing data-driven pricing and inventory strategy.
- Leading migration of company sales data to Google Sheets to eliminate manual file transfers (e.g., via flash drives) and enable secure, automated, multi-user access.

Fonglo I.T Place
Industrial Training Instructor 2018 – 2023

- Trained 500+ industrial training (IT) students — primarily Computer Science, Cybersecurity, and Information Technology graduates — in data analysis, web development, and cybersecurity fundamentals.

- Mentored students through practical, project-based learning, with 25+ reporting successful job placements following the program.

Project

- **SwiftMart Retail Sales Forecasting | Excel, Regression Analysis, Time Series Forecasting**
  Built and compared multiple forecasting models (Moving Average, Exponential Smoothing, Linear Regression, Time Series) to predict product demand, recommending the most accurate approach to improve inventory planning and reduce stock shortages.

- **UK Bank Customer Analysis | Power BI, Power Query, DAX**
  Built an interactive dashboard analyzing customer demographics, account balances, and regional trends across the UK, identifying high-value customer segments to support marketing and retention strategy.

- **HR Attrition Analysis | Excel, Power Query, Pivot Tables**
  Built an interactive HR dashboard analyzing employee attrition and workforce demographics by department, gender, and tenure, enabling targeted retention strategies.

- **Call Center Performance Analysis | Power BI, Power Query, DAX**
  Built an operational dashboard tracking call volumes, response times, and agent productivity, supporting staffing and service quality decisions.
